

5 Ways IMAGE Skincare Can Help You Hype Up Skin Hydration

5 Ways IMAGE Skincare Can Help You Hype Up Skin Hydration

Adding hydrating products to your skincare routine can help your skin look and feel better. With IMAGE Skincare®, it's easy to hype up your skin hydration and leave your skin looking its best. From adding [hyaluronic acid skin care](#) products to using a sunscreen that helps keep your skin protected and hydrated, there are a few options for hydrating your skin. Here are some products you can add to your skincare routine to help hydrate your skin.

VITAL C hydrating water burst

Is dry skin bothering you? Try the VITAL C hydrating water burst. This hydrating gel bursts into tiny droplets when it comes in contact with your skin, helping to quench dry skin. Hyaluronic acid helps your skin absorb moisture better, boosting hydration and helping your skin appear more bright, refreshed, and radiant with the help of vitamins and antioxidants. Chill the gel and apply it after hot showers, or use it whenever your skin needs an extra boost of hydration throughout the day.

VITAL C hydrating facial cleanser

Hydration starts from the first step of your skincare routine. This hydrating [facial cleanser](#) gently removes makeup and impurities without stripping your skin's moisture. Vitamins A, C, and E help boost your skin's radiance while quenching skin with essential daily vitamins and antioxidants. Natural orange peel gives it a fresh, energizing aroma. This cleanser is typically the first step in a skincare routine, and you want to set up your skin to maximize hydration.

VITAL C hydrating intense moisturizer

If your skin is really thirsty, nourish it with the IMAGE Skincare VITAL C hydrating intense moisturizer. This highly emollient creme progressively replenishes your skin's hydration while creating a shield against dryness. Rich moisturizers help support your skin's fragile moisture barrier while soothing dryness, irritation, and sensitivity. Use it in the morning or use it as a nighttime moisturizer to help repair your skin while you sleep. Use it after a serum on cleansed skin in the evening.

VITAL C hydrating eye recovery gel

When you need to hydrate the area around your eyes, choose the VITAL C hydrating eye recovery gel. It's a light, cooling gel that is supercharged with peptides and nourishing antioxidants. It can help reduce the appearance of wrinkles, fine lines, dark circles, and puffiness, all while hydrating, brightening, and refreshing the eye area.

PREVENTION+® sun serum SPF 30 untinted

One of the last steps of your skincare routine in the morning should be applying an [SPF serum](#). The PREVENTION+® sun serum SPF 30 untinted not only provides daily broad-spectrum UV protection but is also formulated with antioxidants to help hydrate and soothe your skin. Plus, it adds a lightweight, dewy finish to your skin. Plant-derived squalane from sugarcane does most of the work in moisturizing your skin, while chamomile soothes your skin. An all-mineral UV filter in a hydrating serum texture is perfect for everyday use. Apply it generously to your skin 15 before you go out in the sun, and reapply it at least every 2 hours or every 80 minutes if you are swimming or sweating, and immediately after towel drying.
