

# **COLLATERAL MANAGEMENT SUGGESTED OPERATIONAL PRACTICES**

---

Go Green Warehouses offers collateral risk management and financial facilitation services.

To help farmers and FPOs make the most of their agricultural value chains, Go Green Warehouses offers collateral risk management and financial facilitation services. Electronic Warehouse Receipts, whether negotiable (ENWR) or non-negotiable (ENNWR), may be easily issued via our robust agreements with WDRA and repositories like NERL and CCRL. Contacting their Repository Participants at WDRA accredited warehouses is one way our clients may request the formation of the same.

## **AGRI-COMMODITY STORAGE AND WAREHOUSING SERVICES**

Our logistics and warehousing services can help you choose the best spots for your business while you're planning its buildout. Close customer cooperation also determines optimal inventory amounts and rack arrangement. Integrating our WMS solution with your ERP system allows you to automate the process of updating inventory in your MM module whenever there is a change in stock and expedite the order processing from your OM system.

## **WAREHOUSING AND THIRD-PARTY LOGISTICS SERVICES FOR ONLINE STORES**

As part of our 3PL Logistics Service, we will be there to help you choose the best locations for your facilities all through the development process. In addition, we collaborate with our clients to determine the best rack layout and stock levels. Our WMS solution may be easily integrated with your ERP system, allowing you to receive orders directly from the OM system and update inventory with any changes by communicating them back to the MM module.

## OUR ASSOCIATED FIRMS

---

## OUR VISION

---

"To create value for the largest community of farmers on the planet and provide world-class services for all our stakeholders in the agri-value chain thereby making India - the food bowl of the world."
