

Custom Refrigeration: Making It Work Every Time with ALTA Refrigeration

Refrigeration is a silent hero that safeguards the freshness of our food, the quality of our products, and the efficiency of our businesses. However, not all refrigeration systems are created equal, and a one-size-fits-all approach often falls short. When it comes to keeping things cool, ALTA Refrigeration knows how to make things happen. This [industrial refrigeration company](#) is expert in creating custom refrigeration systems that work like a charm. Here is a peek behind the scenes at how ALTA Refrigeration designs these fantastic systems that work on massive commercial scales.

Designing Refrigeration Magic

Imagine you have a big puzzle to solve. This puzzle can be different for you, and it can be different for some other business. The same refrigeration system cannot work for storing ice cream and vegetables at the same time. That's the challenge ALTA Refrigeration takes on. They design custom refrigeration systems that fit the puzzle perfectly. One thing that makes ALTA Refrigeration stand out is that they make their equipment right here in the USA. That means they can keep a close eye on quality.

The Team That Makes It Happen

Behind every great custom refrigeration system is a team of experts. ALTA Refrigeration has a team of technicians who have been working with them for over 25 years. That's a lot of experience! Plus, they have four mechanical engineers who are Licensed Professional Engineers..

Solving Problems, Building Dreams

ALTA Refrigeration doesn't just make [refrigeration system](#); they solve problems. Whether you have a tiny space or a huge warehouse, they can build a system that fits just right. They've even got a super-sized system called EXPERT that's keeping things chilly in 61 places across the USA.

From Small to Super-Size

ALTA Refrigeration doesn't believe in one-size-fits-all. They can create a custom system for a small store with just 15,000 square feet of space. And they can also tackle a colossal job, like a 300,000 square-foot cold storage distribution center. It's so big it can freeze a whopping 1,000,000 pounds of stuff every day!

Why Custom Matters

You might wonder why custom refrigeration is such a big deal with [industrial refrigeration companies](#). Well, think about it this way. Would you wear shoes that are too small or too big? Probably not. Custom refrigeration is like getting the perfect-sized shoes for your business. ALTA Refrigeration keeps everything running smoothly and saves you money in the long run.
