DESKTRACK

SaaS Product

INTRODUCTION

DeskTrack is software that helps businesses keep an eye on the time and activities of their employees. It can be used to keep an eye on website visits, application usage, staff break times, and login/logout times. It also provides in-depth reports on productivity and worker performance. DeskTrack is a powerful tool that helps businesses improve employee satisfaction, reduce expenses, and boost compliance.

01 - EMPLOYEE MONITORING SOFTWARE

It is designed to track and analyze the activities of employees during work hours.

02 - TIME TRACKING SOFTWARE

Time tracking software is a tool that allows individuals or organizations to monitor and record the time spent on various tasks.

03 - SCREENSHOT MONITORING

Screenshot monitoring is a feature offered by some employee monitoring software solutions that captures screenshots of an employee's computer screen at regular intervals during work hours.
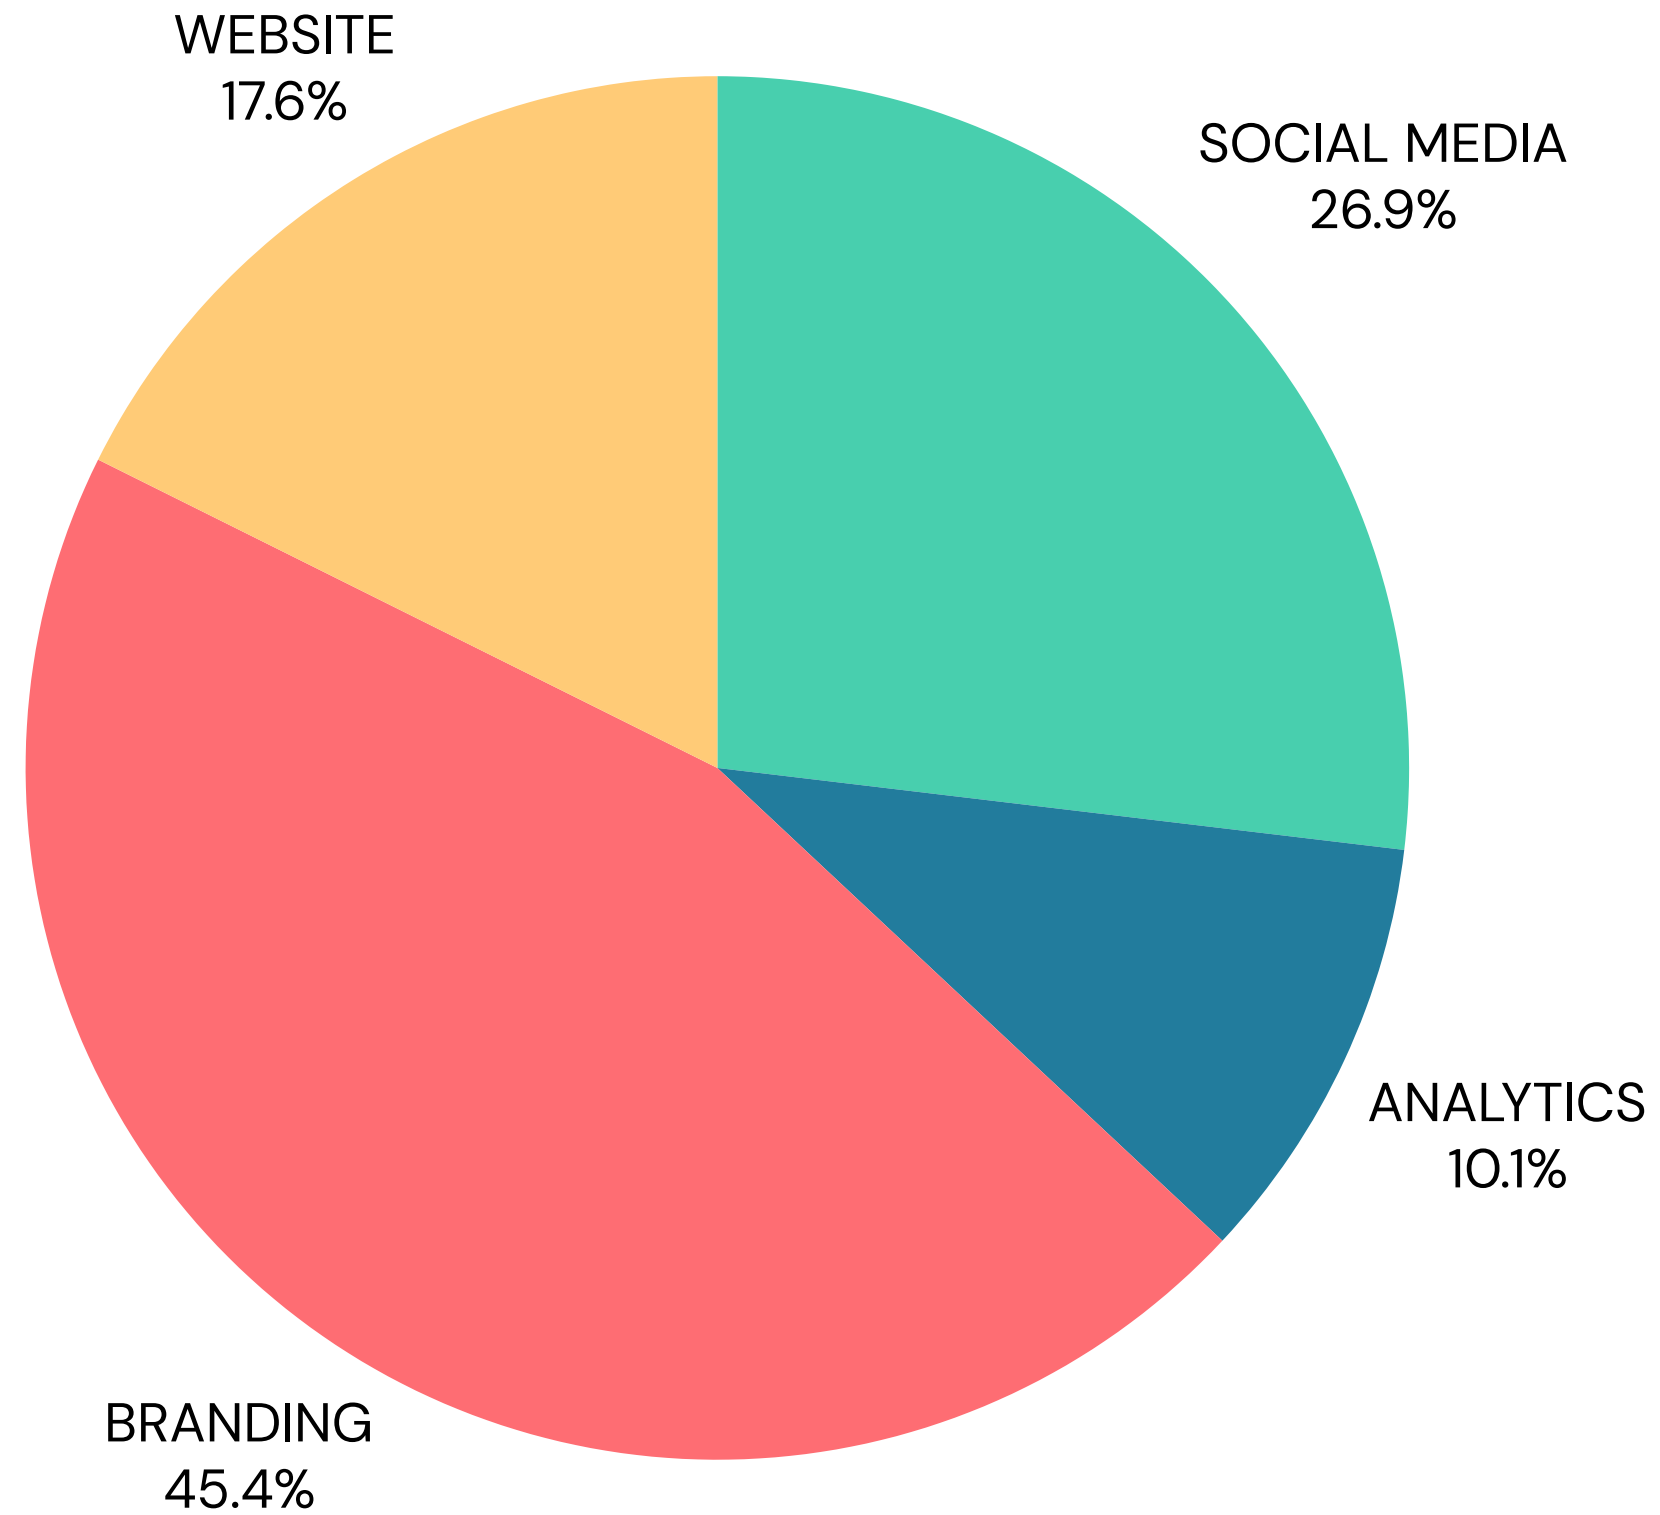

EMPLOYEE MONITORING SOFTWARE

DeskTrack is a feature-rich employee monitoring software that aids businesses in measuring, assessing, and maximizing worker output. Better time management, performance evaluation, and general workplace efficiency are made possible by its capabilities, which include time tracking, productivity analysis, monitoring application usage, and reports.

The main functions and features of DeskTrack are below:

- Time Tracking
- Application Usage Monitoring
- Website Tracking
- Productivity Analysis
- Reports and Analytics
