

DESKTRACK

presentation

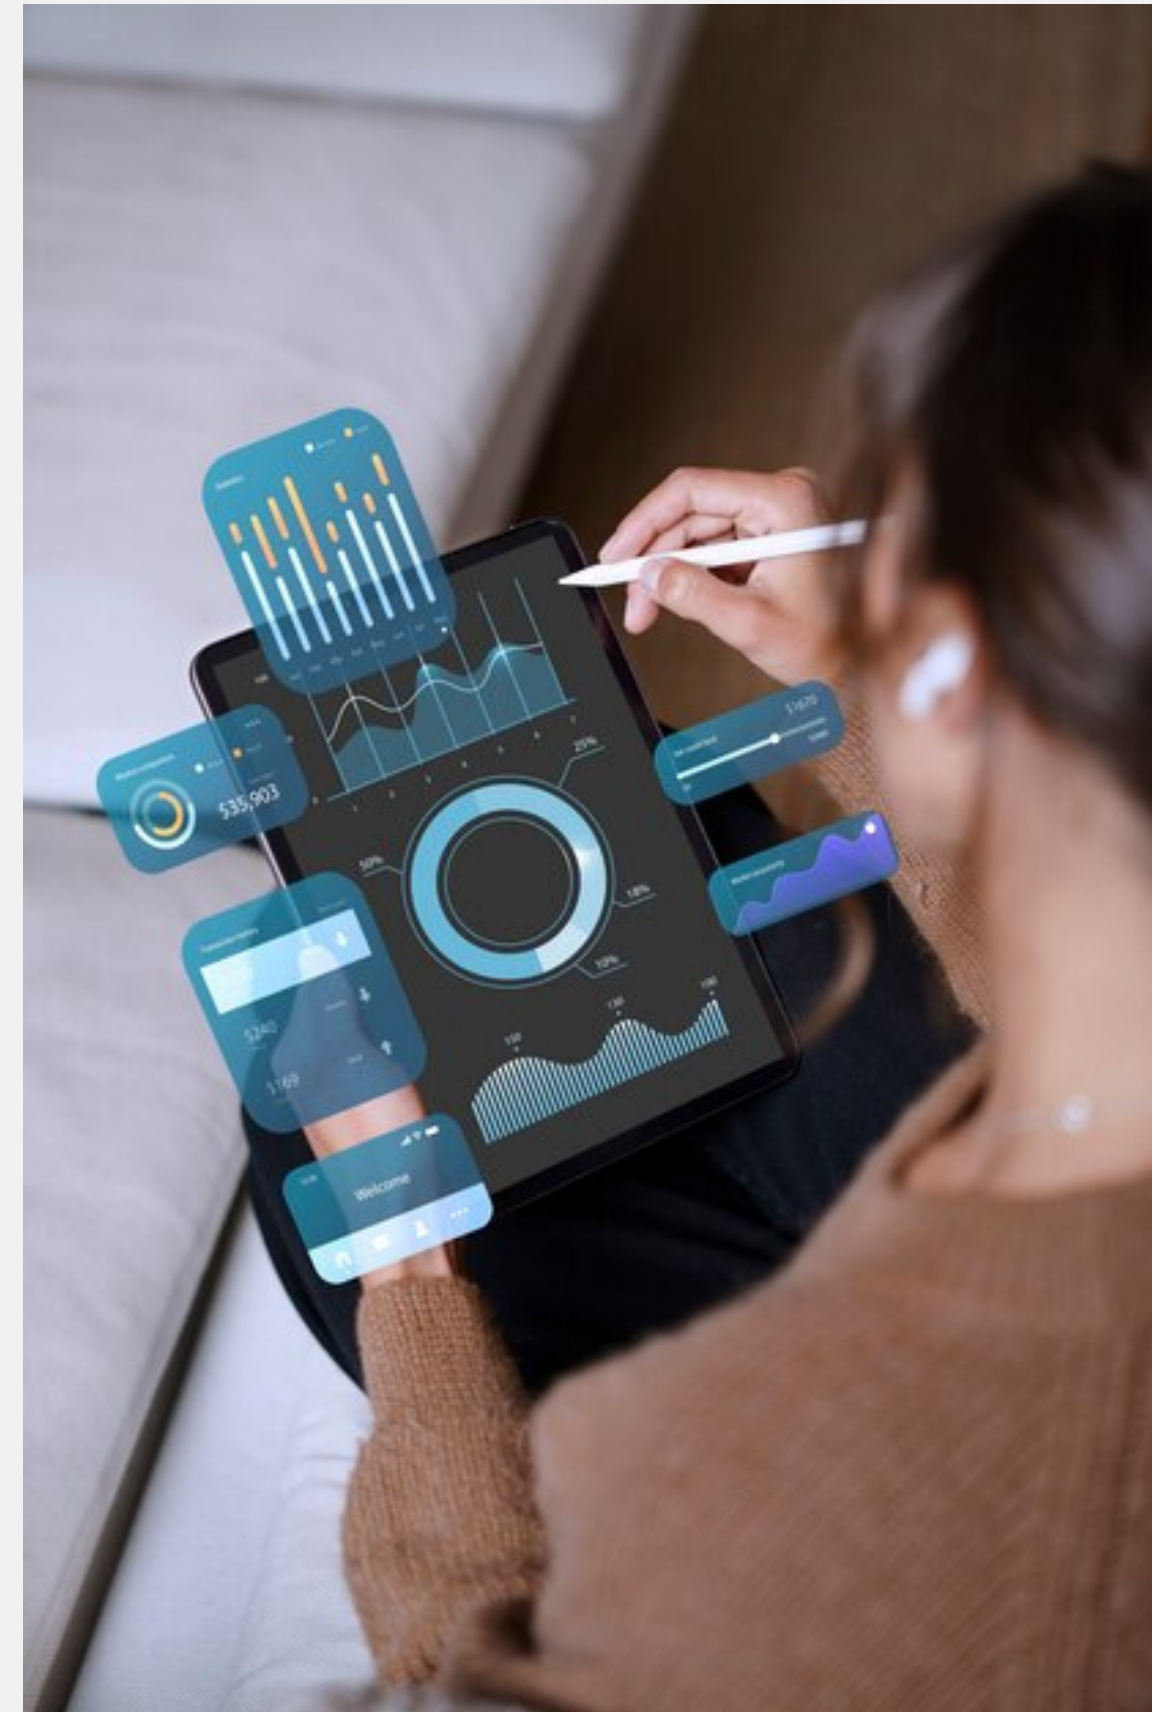

INTRODUCTION:

DeskTrack is a feature-rich productivity and time monitoring tool made to assist companies in measuring and maximizing worker performance at work. It has the ability to periodically take screenshots of employees' computer screens. This function helps confirm productive work hours and provide visual proof of work activities.

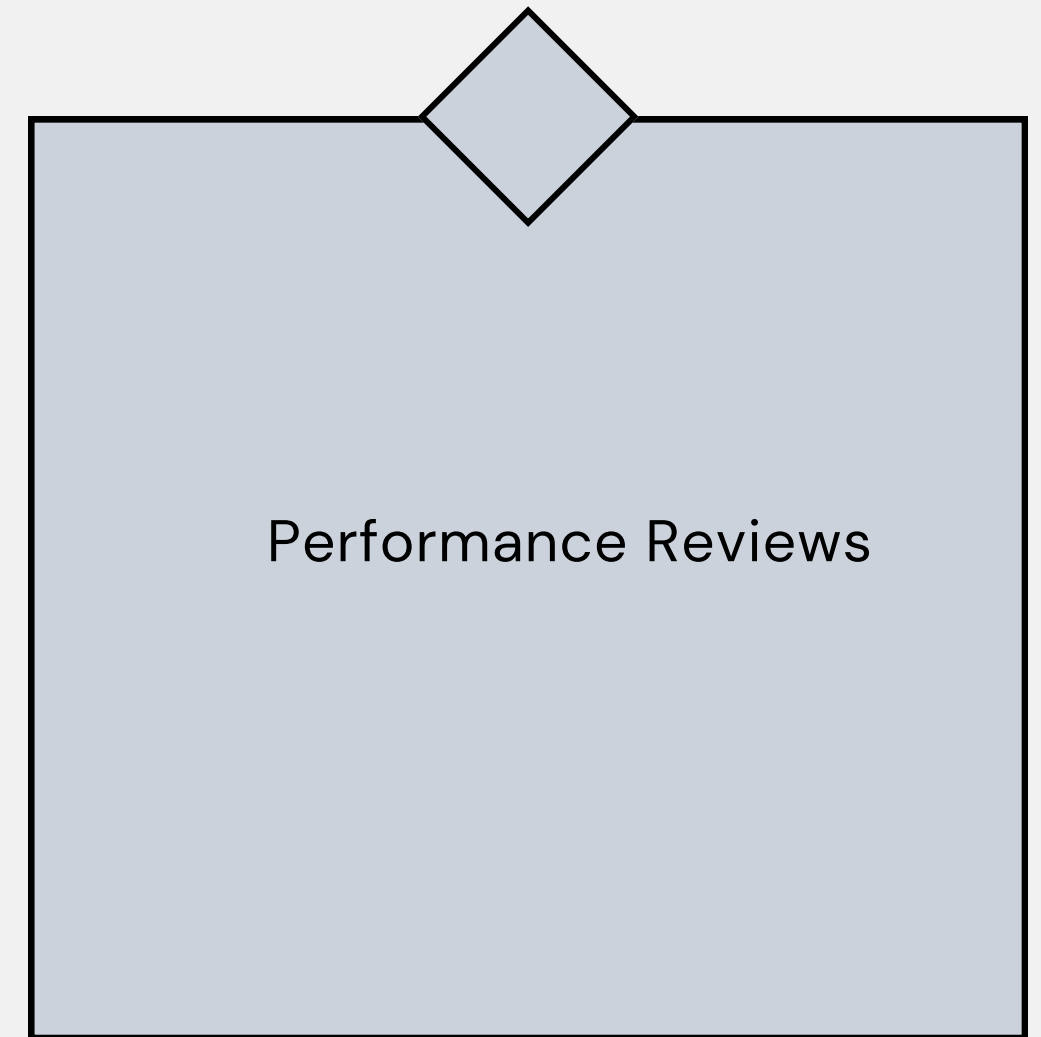

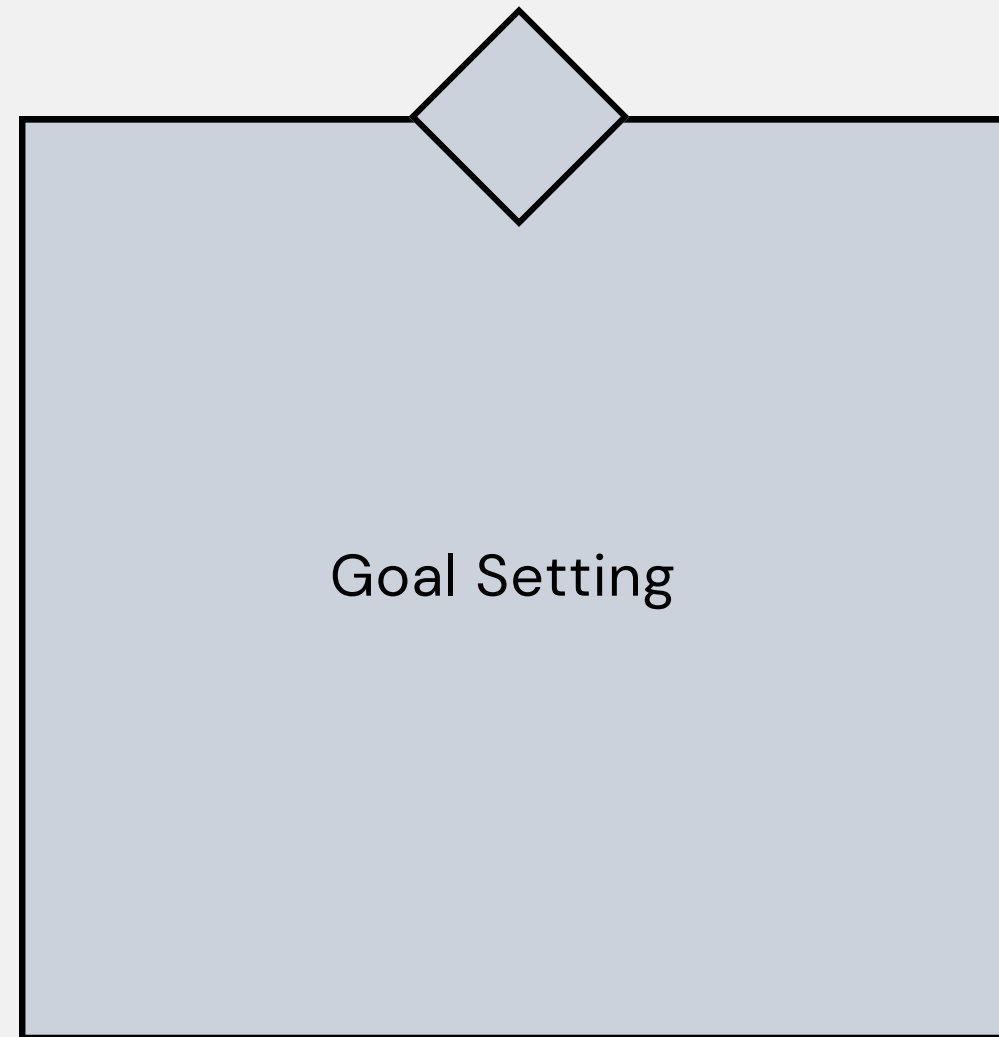

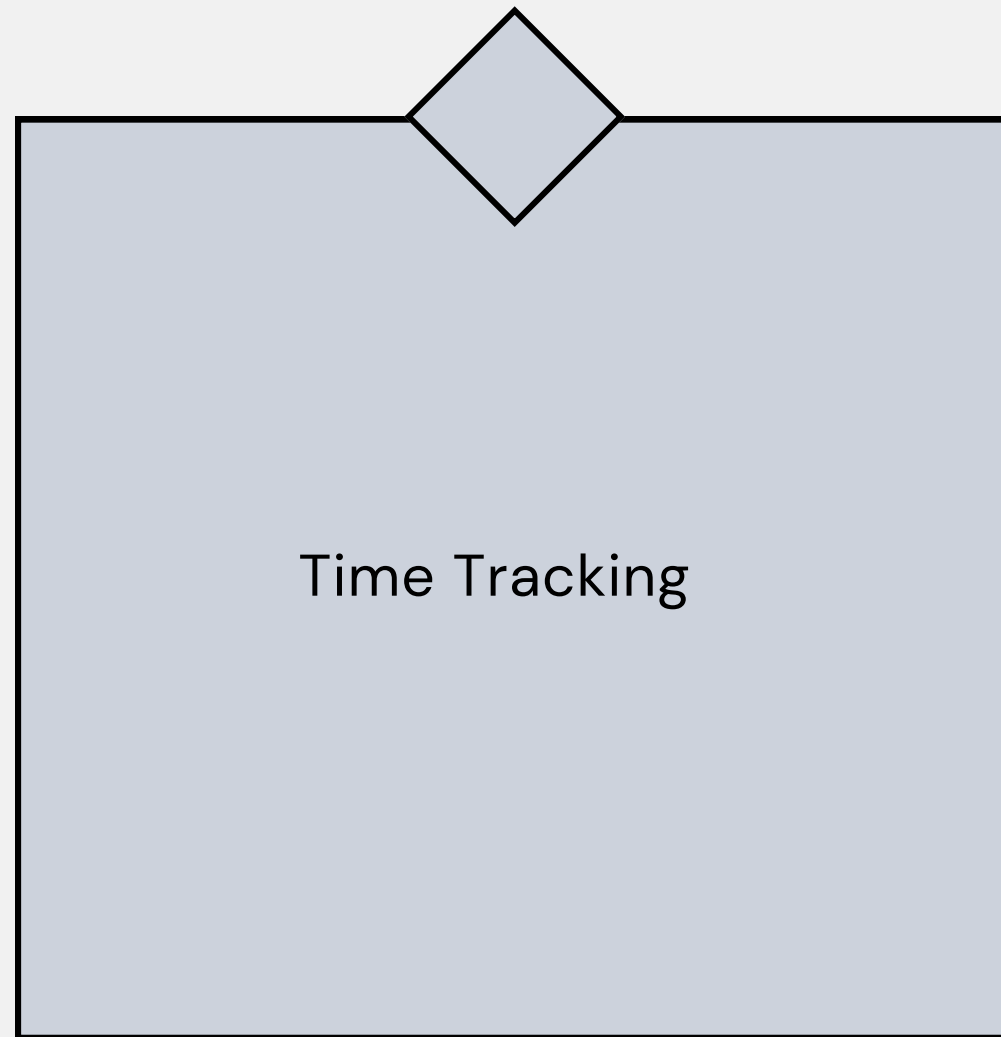

PRODUCTIVITY TOOL

DeskTrack is a software program intended to track employee productivity at work. It can track how much time staff members spend on different assignments and projects. It keeps track of the programs they use, the websites they go to, and how much time they spend on each task.
