What's New in FTM 2019

Since FTM 2019 has been released, developers continuously try to make it better. Whenever a new version of any software is released it means there are some new features added. This is same as in the condition of Family Tree Builder software.

Developers add some new features in family tree creator software and released its new and latest version. FTM 2019 comes with some new and amazing features that are given below.

Hint in the Index

Profile Picture Perfection

This feature provides

more than 6 billion online historical records that are helpful to search your ancestors. This is a new source of records for family tree builder users.

Choose the best profile picture

This is a new tool included in FTM 2019. This tool helps in profile picture cropping and gives you the best profile picture perfection. This feature has smart technology that detects the person's face and zooms in right amount.

Turn Back Time

TreeVault Cloud Services

This feature is for that time when you do something wrong in your family tree. With this feature you can get back the changes that you made. This feature provides you the undo facility up to 1000 times. Means if you do 1000 changes by mistake then with this feature you can revert them.

With tree vault cloud services the family tree maker comes beyond the thoughts. TreeVault cloud services provide you the facility to check the real time changes in your family tree. You can check your family tree through your smartphones or tablet.

AlbumWalk Media Player

This feature change the old photo albums into new way. With the feature, you can see the interactive talking photos with SoundSpot. It is just like a mini documentary in which you can record every person sound with the photos.
Top Features of Family Tree Maker Software

Rich Color Coding

Photo Darkroom

This feature is adding in the request of genealogist who are using FTM 2017. In this feature, now you can assign a different color coding for the descendants not only on the home page but each ancestor's descendants.

This is a simple editing tool that helps you to make your old photos as new. Using the photo darkroom feature, you can make your old or faded photos as they are clicked in the present time.

Charts and Reports

Ease Media Organization

Sharing your discoveries with a variety of colourful family tree charts such as descendant and pedigree is a good idea. Family Tree builder helps you in this. In FTM software, you will get beautiful and attractive charts and reports. You can also make a report for anniversary, birthday, contact list, and more.

In FTM software you can easily organized your media like photos, historical records, audio and video files easily. You can directly scan your photo from your family tree. Apart from this, you can also create a slideshows.

Ancestors on Map

Companion Guide

In FTM 2019, you can easily access interactive street and satellite maps to view important places. You can easily indicate your ancestors on map which helps you to track your family's migration paths.
Companion guide is just like a guide for family tree maker software. In a companion guide, you will get 15 chapters in which all things are described regarding family tree builder software. You can also download and check your companion guide status.
