

DESKTRACK PROJECT

Presented by: Ritesh Sharma

ABOUT US

DeskTrack is a feature-rich productivity management and time monitoring tool made to assist companies in keeping an eye on and evaluating worker activity. It provides a number of functions targeted at raising overall productivity, monitoring project progress, and increasing efficiency. It makes data security and privacy a top priority, guaranteeing the protection of private employee data. The software protects integrity and confidentiality by conforming to industry norms and laws.

FIELD EMPLOYEE TRACKING SOFTWARE

You can monitor your field and remote workers in real-time, from any location, at any time, with the DeskTrack **field employee tracking software**. With the help of the field employee tracking application, workers may manage their attendance records without physically visiting their designated offices and can clock in and out from any location.
