

## **Fieldking 6-Foot Rotavators - Key Features**

The rotavator is an essential implement for soil preparation. Among the trusted names in the industry, Fieldking's 6-foot rotavators have gained immense popularity for their exceptional performance and features. The [Fieldking rotavator 6 feet price](#) range starts from INR 113,000 and can go up to INR 140,000 in India.

Fieldking's 6-foot rotavators are delivering high-quality agricultural machinery to Indian farmers. With their robust construction, efficient blade design, and versatility, these rotavators have earned the trust of farmers looking to enhance their soil preparation processes.

### **Robust Construction:**

Fieldking's 6-foot rotavators are engineered with durability in concern for farmers. They feature a high-quality material for robust frame and body. This ensures a long service life and minimal maintenance requirements.

### **Efficient Blade Design:**

The heart of any rotavator is its blades and Fieldking's 6-foot rotavators shine in this regard. They are equipped with boron steel blades. Their lifespan is increased by specially designed blades that offer superior cutting and mixing performance. These blades are known for their sharpness, durability, and resistance to wear and tear. Additionally, Fieldking rotavators come with 42–54 L-type blades, and C and J-type blades.

### **Gearbox and Drive System:**

Fieldking's rotavators are equipped with a robust side-type transmission that has multi-speed options and a speed reduction system. This gearbox and drive system efficiently transfers power from the tractor to the rotavator. This results in consistent and reliable performance, even in challenging soil conditions.

### **PTO Compatibility:**

Fieldking 6-Foot Rotavators are designed to work seamlessly with a wide range of [tractors](#). Fieldking 6- Foot rotavator required take-off (PTO) power from 40 HP to 90 HP.

### **Safety Features:**

Fieldking's rotavators come with safety features such as shear bolts that protect the implement from damage in case of an obstacle encounter. This ensures the longevity of both the rotavator and the tractor.
