From Fighting Fine Lines to Acne: IMAGE Skincare® Can Help You Look Your Best

Whether you are looking for a [hyaluronic acid serum](#) to help reduce visible signs of aging or you want to prevent acne, there are IMAGE Skincare® products that can help you look your best. Acne, fine lines, wrinkles, and dull skin are all concerns that IMAGE Skincare products address, and choosing the right one for your skin or concern is easy. Here are some options.

Plump Your Lips

Do you want the look of soft, plump lips? The ORMEDIC [lip treatment](#) is a cult-favorite product that helps moisturize, soften, and plump your lips. Avocado oil and vitamin E help nourish your lips, instantly soothing and comforting dry lips. Your lips look fuller thanks to a polypeptide complex with palmitoyl tripeptide-5. Your lips will look naturally firm and full, enhancing the appearance of lip volume for an overall plumper appearance. You can even add it over your favorite lip cover to give it a gloss look while locking in moisture.

Erase Fine Lines

Smoothing away fine lines and wrinkles doesn't have to be a complicated process. The AGELESS total pure hyaluronic 6 filler offers—that's right—six forms of both lower and higher molecular weight hyaluronic acids. These all work together to deliver a noticeable boost of hydration, smoothing away the appearance of wrinkles and other signs of premature aging and filling in lines without needing an injection. Cross-linked, time-released hyaluronic acid binds water, acting like a magnet to draw hydration into your skin, plumping it from within while hydrating your skin for a healthy-looking, youthful glow.

Cleanse to Prevent Acne

Lather away excess oil, shine, and impurities with CLEAR CELL salicylic gel cleanser. This cleanser is formulated with 2% salicylic acid, which gently exfoliates dead skin that can clog pores and lead to acne. You get an invigorating cleansing experience with a refreshing blend of mint, eucalyptus, and tea tree oils. It's perfect for cleansing your skin of dirt and other impurities while keeping acne at bay. Because it has salicylic acid, you may want to alternate it with another cleanser to avoid drying out sensitive skin.

Try a Facial

Do you have other concerns you want to address but would like a professional's help? Try a [Hand and Stone facial](#) using IMAGE Skincare products. The IMAGE Classic Facial is completely customizable and tailored to your skin concerns and needs, helping to hydrate, nourish, and brighten your skin. The Oxygenating Facial helps you feel refreshed and leaves you looking glowing and luminous. The Organic Lift does things the natural way, helping your skin look balanced and healthy while restoring it with antioxidants and aloe vera. The MD Power-C Peel uses exfoliating AHAs, fruit enzymes, and powerful vitamin C to nourish your skin while firming and visibly brightening your skin.
