

## **Key features of an e-cigarette POS solution you should know**

---

Establishing an e-cigarette store could be easier if you possess the license to own one. But, running it efficiently might not be as easier as it would seem. Keeping costs down and managing relationships with buyers could be challenging. Also, updating orders for new inventory is a time-consuming task if carried out manually. So, an **e-cigarette point of sale software Philadelphia** is needed to fill out purchase and sale orders quickly and to manage stock delivered by the vendors. Here are some prominent features of good POS software that you should involve in your business.

### **Cloud technology**

If you are owning a retail chain of e-cigarette stores then you should choose a POS system with cloud technology. Such a system can allow you to store all of your data and give remote access to manage the business from anywhere. In addition to this, the cloud system can store your data more securely by creating periodic backups. Apart from this, cloud-based **e-cigarette POS software Philadelphia** will centralize your information and allow you to access it anytime without even being presented in the store. At **The GuruWay**, we can provide you with a high-tech POS system that can even function in offline mode. Although, the system requires a strong internet connection. But can be supported with offline function mode as well to deliver uninterrupted working.

### **Inventory updating and managing**

In this modern era, it is imperative to choose a POS system that supports the inventory management function. Inventory management is a crucial aspect to propel the e-cigarette business in the competitive market. Indeed, this feature could save you a lot of time and money as it will automate the process of tracking stock whenever needed. The stock listing can be

maintained automatically by the **e-cigarette point of sale system Philadelphia**. Also, it can order the e-cigarettes in serial order as per size, flavors, packs, and date of storage.

### **Generating custom reports**

This remarkable feature of the **e-cigarette POS system Philadelphia** is really commendable. It will allow you to track the performance of your business by generating up-to-date reports regularly. You can generate sales reports, and simplify stock, and employee management. Using these reports, you can analyze what work is done efficiently by your team and what improvements are needed. You can track per-day sales of e-cigarettes to make decisions for improving the revenue. Also, these reports keep you prepared for the major changes that you are considering making in your business.

### **Ongoing customer support**

Technical support is vital to have great security for you and your e-cigarette business. So, **The GuruWay e-cigarette POS software in Philadelphia** comes with 24×7 customer support via phone or ticket. Our experts are always ready to provide you with assistance relating to any issue you are facing to run specific functions of the POS. Thus, it would give you a pleasant experience of using the system and your staff can evade the risk of errors during routine use of software.
