[Maxgun Sublingual Spray online](#) medication functions by raising the flow of blood to the male organ. This helps men to gain or maintain an erection during sensual contact with the lady. Men can just spray the medication one or two times 20 to 30 minutes before the sensual interaction.

Symptoms of impotence or erectile disorder in males

Men suffering from erectile disorder observe the following symptoms:

- Unable to get an erection during the lovemaking activity with the companion
- Unable to maintain an erection during the lovemaking activity with the companion
- Low sensual drive
- Low libido
- Low self-esteem
- Depression
- Distress for the man suffering from the erectile disorder and his companion

When a man is suffering from the problem of erectile disorder he must contact a primary care provider or an Urologist for further assistance. The problem of erectile disorder is a major sign of

cardiovascular disease. This might indicate that a man is suffering from blockages in the vascular system. Various reports show that men suffering from erectile disorder are at a greater risk of struggling from heart attack, stroke or circulatory problems in the legs. Erectile disorder can have a great impact on the well-being of a man and even his relationship as well.
