Shop By Concern: Which IMAGE Skincare® Products Should You Use for Oily Skin?

Having too much oil on your skin can make for challenging skincare. It can clog pores, lead to more breakouts, and your face shines more than you want.

But, if you want to address these concerns, IMAGE Skincare® can help. Their lineup includes different products perfect for oily skin. From [retinol skincare](#) to balancing cleansers, here are the best IMAGE Skincare products for oily skin.

CLEAR CELL clarifying repair crème

If you have oily skin and are experiencing fine lines or an uneven texture, this [salicylic acid cream](#) from IMAGE Skincare is for you.

The CLEAR CELL clarifying repair crème slides perfectly into your nighttime routine. After you cleanse, this repair crème works to improve oiliness while helping reduce the appearance of wrinkles, skin discoloration, and uneven skin texture. The salicylic acid removes dead skin cells and leaves your skin feeling fresh.

AGELESS total overnight retinol masque

Another good addition to your nightly routine, the AGELESS total overnight retinol masque not only helps even out your complexion but can also help minimize visible signs of aging that might be caused by excess oil.

When left on overnight, the time-released retinol technology can help your skin look revitalized and feel better than ever. If you're starting to repair the effects that too much oil has had, this is a great overnight masque that works while you sleep.

PREVENTION+ daily tinted moisturizer SPF 30

No matter what type of skin you have, you can benefit from a daily [tinted moisturizer](#). Sunlight can stimulate extra oil production, while UVA and UVB rays can worsen irritation caused by excess oil.

That's why the PREVENTION+ daily tinted moisturizer SPF 30 should be a part of your daily routine.

This broad-spectrum SPF moisturizer offers pure mineral protection, and an antioxidant blend supports your skin's defenses against environmental stressors. Plus, if oil is causing an uneven skin tone, this tinted moisturizer helps even it all out and can give you a warm and healthy glow.

ORMEDIC® balancing facial cleanser

The key to dealing with oily skin is cleansing. Cleaning your face gets rid of the oil and other impurities that have accumulated.

IMAGE Skincare's ORMEDIC® balancing facial cleanser can help keep your skin clear and pores clean while being gentle enough to avoid irritation. The formula includes organic aloe vera and botanical extracts that can help soothe your skin and restore a soft and balanced complexion.

CLEAR CELL restoring serum

You might be tempted to use fewer products on your skin when dealing with excess oil, but if you use the right ones, you can still maintain a full routine. The CLEAR CELL restoring serum is one of those products.

It's lightweight and quick to absorb, delivering hydration to congested or blemished skin. It utilizes vitamin C to help reduce the appearance of discoloration. And it meets the IMAGE Skincare standards of clinical skincare without parabens, mineral oils, or synthetic dyes. You and your skin will love it.
